

Canadian Coalition
for Immunization Awareness
& Promotion (CCIAP)

Get immunized...
The reasons are all around you.

Who are we?

We are a partnership of more than 25 national groups. We are a group of health care professionals, non-governmental organizations, businesses, consumer groups, and governments.

What do we do?

Our main goal is to help Canadians learn more about immunization. We work together to promote knowledge about vaccines, how they are used, and their value and safety. We urge all Canadians to follow the guidelines set by Canada's National Advisory Committee on Immunization.

How will we know we have succeeded?

Our work will help Canada to control and reduce the occurrence of diseases that vaccines can prevent, and their complications. We are working hard to increase awareness about the benefits of immunization for people of all ages. We do this through education, promotion, advocacy, and media relations.

What can I do?

- Get your children vaccinated
- Support programs to immunize children in Canada
- Talk about the importance of immunization programs with your family and friends
- Join the CCIAP Network to receive information on immunization, via e-mail
